Frontiers of Knowledge

Frontiers of Knowledge offers a rigorous view of the state of the art, and new perspectives, in the most characteristic fields of knowledge of our time.

OpenMind is an online community whose objective is to debate about the great topics of our time as to generate and diffuse knowledge that will benefit society as a whole. More than two hundred leading authors, experts and academics from all around the world examine the greatest challenges of science, technology, the economy and business, and the humanities.

Content

This book is conceived as BBVA's contribution to an extraordinarily ambitious task: offering the lay reader a rigorous view of the state of the art, and new perspectives, in the most characteristic fields of knowledge of our time. Prestigious researchers from all over the world, working on the «frontiers of knowledge», summarize the most essential aspects of what we know today, and what we aspire to know in the near future, in the fields of physics, biomedicine, information and telecommunications technologies, ecology and climate change, economics, industry and development, analyzing the role of science and the arts in our society and culture.
